We hope you enjoy this edition of the Norman Regional Laboratory Service’s (NRLS) Reference Guide. This reference catalog took great effort to compile. Its completion is a testament to the hard-working and dedicated laboratory professionals who labor behind the scenes every day of every year to provide over 4 million test results to our valued customer, the health care provider. Behind every health care provider we serve is a patient. That patient desires world class health care, which is why our mission statement reflects our commitment to exceptional quality and our vision is to be recognized as the premiere laboratory service provider in the region.

We have made great effort to perform, at NRLS any and all tests that we are certain we can perform well and report results quickly. Those tests that we deem necessary to send out are forwarded to a network of reference laboratories, each of which has been evaluated and determined to be fully accredited and capable of delivering timely, quality, and cost-effective results. We are especially pleased to partner with Mayo Clinic Laboratory as our primary reference source.

A good laboratory is a work in progress. Testing can and will change with technological advancements and market forces. We are committed to changing with meaningful progress in areas where improvements in patient care can be made. We invite you to join in this endeavor by maintaining a dialogue with us and letting us know how we can do better.
